1 [Dear Sir: I am writing this brief note to convey my disbelief that, against the majority of citizens in the state and the Indian tribe that considers the mountain a holy place, the federal government is moving forward with its plan to use Yucca Mountain for a nuclear waste dump. Given the instability of the mountain and surrounding area, this is a foolish plan that can only backfire with serious future repercussions, including contamination of the water and land and the resulting serious illnesses. Please do not inflict this fate on this or any other state.] Hugh Sanborn, 6006 Southridge Greens Blvd., Fort Collins, Colorado 80525; 970-225-0983; hwsanborn@comcast.net
